Dear all,

Tuesday we had Elizabeth Irvin-Barnwell down here to collect samples for the EPA study and we discussed the sampling procedure.

When you collect samples I strongly recommend that you use a lance so you get all particle sizes from the bag.

If you just scoop from the top of the bag you will only get the coarser material and the sample will not be representative.

In case needed I can provide you the lances.

Best regards

[REDACTED]

Hi all,

As part of the federal action plan on the use of recycled tire crumb in sports fields, we will be touring [REDACTED] a tire recycling facility in [REDACTED]

Please respond to the Doodle poll so we can lock down the date for the tour:
Ex. 6 Personal Privacy (PP)

Doodle:
Tour of
tire crumb
processing
at [REDACTED]

[doodle.com](https://www.doodle.com)

The purpose of the tour is to see the processing of tires into crumb rubber infill for sports turf, and ask questions around the source and variability of feedstock, processing technologies and variability in end product properties. The proposed time frames are for the tour of the facility, only; attendees should plan to fly into [redacted] the night before or take an extremely early flight on the day of the tour.

(Please also keep in mind that you will either have to fly into [redacted] the day before or very early on the day of the tour.)

Thank you,
Ksenija
